Introduction

- Projects & Leadership

17.1 Leadership in project management

Leadership Style

- Leadership is the ability to influence the behavior of others to accomplish something desired
- *Leadership style* is the way a leader achieves that influence
 - Task oriented Leadership Style (or Goal oriented)
 - Relations oriented Leadership Style

17.1 Leadership in project management

Situational Leadership

- The leader should apply the style that best fits the situation and not use the same style for all employees and situations.
- Project managers seldom manage unskilled laborers; they deal with technical specialists, managers, professionals, tradespeople, and other skilled people. Usually work with people who are either:
 - Able but perhaps unwilling to do what the manager wants, or
 - ***Participative leadership style:*** Leader facilitates, supports, and communicates with followers, and the leader shares decision-making with them.
 - Both able and willing to do what he wants.
 - ***Delegating leadership style:*** Leader identifies the problem or goal, then delegates to followers responsibility for solving the problem and determining how to implement it.

17.1 Leadership in project management

PROJECT MANAGERS USUALLY LEAD SKILLED PEOPLE, NOT UNSKILLED LABOUR.

They include technical specialists, managers, professionals, tradespeople and other skilled individuals.

**ABLE BUT PERHAPS
UNWILLING**

USE: PARTICIPATIVE LEADERSHIP

-  Facilitates
-  Supports
-  Communicates
-  Shares decision-making

Purpose:

Build buy-in
and motivation

**ABLE AND
WILLING**

USE: DELEGATING LEADERSHIP

Defines the problem or goal

Delegates responsibility

Allows followers to solve
and implement

Purpose:

Give autonomy
to capable people

In project environments, the challenge is often not ability, but willingness and engagement.

Videos

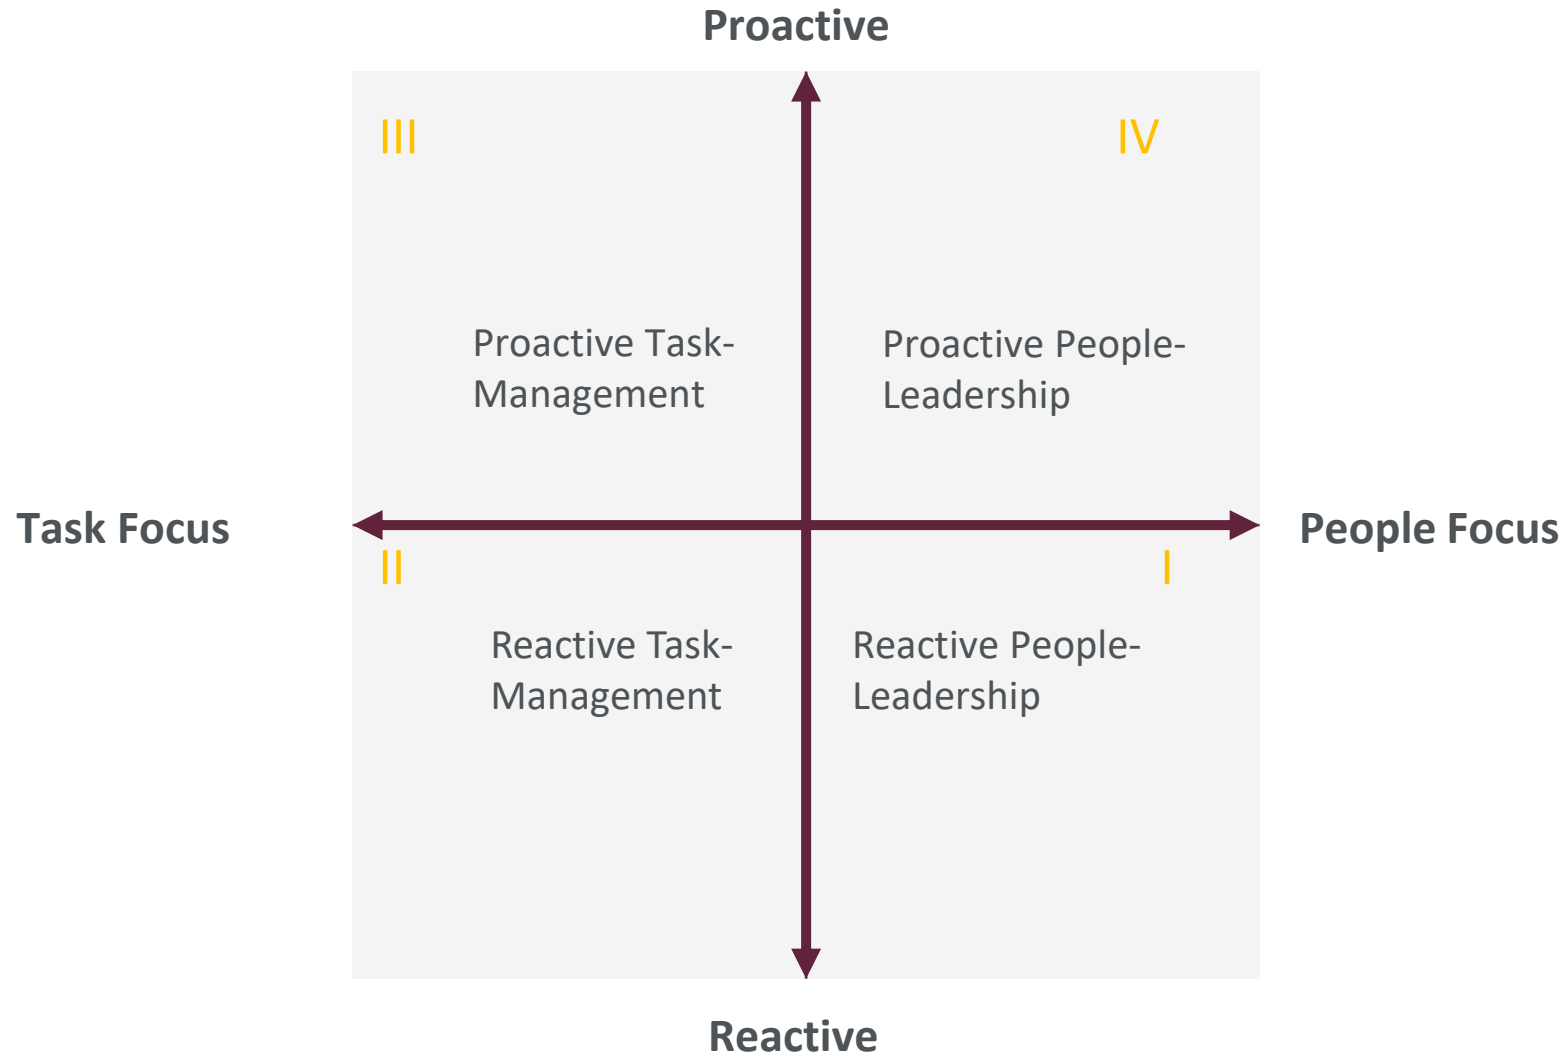

For this session I want you to go through the videos published on SunLearn under this section

- Video 1 : What is Project Leadership
- Video 2 : The Project Leadership Matrix
- Video 3 : How to be a great leader

PS: The quiz as well as the assessments will contain questions from the content of the video's

The Project Leadership Matrix

Project Roles and Stakeholders

- Projects are seated within a very complex environment, with complex reporting lines, relationships, roles and responsibilities
- This session we will look at some of these roles and responsibilities as well as taking a look at project stakeholders

Handbook

- 16.1 The Project Manager's Role
- 16.2 Project Management Authority
- 16.3 Project Manager Qualifications
- 16.5 Roles in the Project Team
- 16.6 Roles outside the Project Team
- 16.7 Project Stakeholder Engagement

16.1 The Project Manager's Role (1)

- The PM is the centrepiece of the project which fills the following roles:
 - 1.Integrator:** Ensures all project components work together to meet objectives.
 - 2.Communication Hub:** Acts as the central point for all project communications.
 - 3.Decision Maker:** Makes critical decisions affecting the project's direction and resources.
 - 4.Motivational Factor:** Inspires and motivates the team to achieve their best.
 - 5.Evangelist:** Promotes the project's value and generates support among stakeholders.
 - 6.Entrepreneur:** Seeks opportunities for innovation and navigates the project towards its goals.

16.1 The Project Manager's Role (2)

- The PM's main responsibility is to deliver the project's end item as planned, schedule, cost and according to the agreed quality
- PM's responsibilities include:
 - Planning project tasks and end results
 - Selecting and organising the project team
 - Working with and negotiating with influential stakeholders
 - Monitoring and communicating the project status
 - Identifying functional and technical problems
 - Solving problems
 - Dealing with crises and resolving conflicts
- It is important that PMs understand the technical environment they work in, but need not be specialist (they are project management specialists)

16.2 Project Management Authority

- Authority refers to a manager's power to command (from an organisational point of view)
- Types of authority include:
 - Legal authority – given by the organisation and linked to the job and role
 - Charismatic authority – linked to personal characteristics
- PMs have to rely on others to get the job done
- To do this they need the following:
 - Knowledge
 - Experience
 - Personal relationships

16.3 Project Manager Qualifications (1)

- Personal characteristics:
 - Flexible and adaptable
 - Preference for leadership and initiative
 - Confidence, persuasiveness, verbal fluency
 - Effective communicator and integrator
 - Able to balance technical solutions with time, cost and human factors
 - Well-organised and disciplined
 - Generalist rather than a specialist

16.3 Project Manager Qualifications (2)

- Interpersonal skills:
 - Asking leading questions
 - Remaining quiet and allowing others to talk
 - Reflecting on answers and feedback
 - Reflecting on other persons' emotions
- Active listening: LEAR
 - Listen
 - Explore
 - Acknowledge
 - Respond

16.3 Project Manager Qualifications (3)

- General Business skills:
 - Understanding the organisation
 - Knowledge of management:
 - Marketing
 - Accounting
 - Contracting
 - Purchasing
 - Human resource
 - Other business concepts
 - Ability to translate business requirements into project and system requirements
 - Active interest in teaching, training and developing subordinates

16.3 Project Manager Qualifications (4)

- Other skills:
 - Technical skills
 - Selecting and recruiting
 - Training

16.5 Roles in the Project Team (1)

- Members in the Project Office
 - **Project Engineer** – Coordinating technological areas and assures integrated design of end items
 - **Contract administrator** – responsible for the legal aspects of the project and its contractors, subcontractors, vendors etc.
 - **Project controller** – works with functional managers to identify tasks and individuals and ways to control the tasks
 - **Project accountant** – provides accounting support
 - **Customer liaison** – maintain and manage customer relationships
 - **Production coordinator** – plans and coordinates aspects relating to production in the project
 - **Field or site manager** – oversees construction, installation, testing, and handing over of the end item

16.5 Roles in the Project Team (2)

- Members in the Project Office (continue)
 - Quality assurance supervisor – establish and administer quality issues in the project
- Functional Managers
 - Responsible for maintaining technical competency and staffing and executing project tasks within their disciplines and functional areas
 - Their authority depends on the project structure in the organisation

16.6 Roles outside the Project Team (1)

- Manager of Projects / PMO Director / Head of Projects
 - Oversees multiple projects
 - Direct and evaluates all PMs
 - Link between the organisation, its resources and the project
 - Link between the project's needs and the functional heads – resources
 - Managing the development of project management policies, processes and techniques
 - Ensure consistency among projects

16.6 Roles outside the Project Team (2)

- Top Management
 - Makes major decisions about project selection and prioritising
 - Approve project feasibility studies
 - Select project managers
 - Authorise project start-up
- Program Managers & Project Supporters
